

Where the Hardware Stops... ...the Information Starts!

As a provider of solutions for perishable product management, Sensitech partners with customers to develop monitoring programs that ensure consistent delivery of quality products and satisfy FDA documentation requirements. Managing the distribution of perishables means more than choosing a piece of hardware that records temperature - it means choosing a complete system that delivers valuable information about the performance of your cold chain. *That system is TempTale.*

**Discover why the only
valid choice is...**

USING OUR SYSTEM

CAN PREVENT YOUR CUSTOMERS FROM USING *THIS SYSTEM!*

The future of perishable product management has arrived. At Sensitech, we've partnered with hundreds of customers to develop programs that ensure the delivery of quality perishables. Managing the distribution of perishables means more than choosing a piece of hardware that records temperature - it means choosing a complete system that delivers valuable information about the performance of your supply chain. That system is TempTale.
